PhD Workshop Course Series

Title: Sourcing Data - WRDS

Objective: The session aims to introduce the WRDS platform, highlight its major features, and demonstrate how to locate the data sources available through our institution's subscription.

Target Audience: This session is ideal for participants who want to learn how to access data on the WRDS platform and explore additional services it offers, such as code replications.

After this workshop, you will be able to:

- Navigate the WRDS website and locate the data sources available through our institutional subscription.
- Access manuals, data dictionaries, sample code, and support resources on the WRDS platform.
- Download data using the web interface.
- Identify table and column names of the data items through the web interface.
- Understand the data procurement process and how it works.

Topics:

- Accessing WRDS
- Common data sources in WRDS
    - CRSP
    - Compustat
    - IBES
    - Others (Revelio, RavenPack)
- Browsing WRDS
    - Code replications
    - Manuals
    - Data dictionaries
    - Identifying outdated content
- Downloading data from WRDS
    - Web
- Preview data without downloading
- Running batch jobs and stopping running processes
